

SOFIX®

By Chem-Crete

SOFIX® eliminates moisture transmission in concrete. Based on patented, dual-crystalline technology, product performance meets or exceeds the requirements of your most demanding projects. The technology provides a long-lasting, "continually-active" barrier not found in other products. Superior to typical barriers or coatings, the protection is surface-penetrating and eliminates issues related to film-forming products. Easy to apply on fresh or existing concrete, no other product in the market offers this type of protection. With the additional benefit of being a VOC free, Environmentally Preferable Product, Sofix is the product of choice for concrete professionals.

- Resists Hydro-Static Pressure (Moisture and Vapor)
 - Sofix 100 - Resistance up to 10Lbs (ASTM F1864 - 1,000ft²/24Hrs)
 - Sofix 700 - Resistance up to 16Lbs (ASTM F1864 - 1,000ft²/24Hrs)
- Surface Penetrating
- Dual-Crystallization (Hydrophilic and Hygroscopic)
- Single Component
- Easy to Apply
- Above-Grade or Below-Grade Application
- Positive and Negative Side Application
- Indoor or Outdoor Application
- Non Film-Forming
- Enhances and Protects the Adhesion Performance of Most Coatings and Joints Sealants
- Environmentally Friendly (No VOC, No Odor, No Fumes)
- Made in the U.S.A.
