

Covers up to 6,800 square feet per minute

Chem-Crete
CCC 100

PAVIX™

Application Machine

Multi-Function PAVIX Applicator

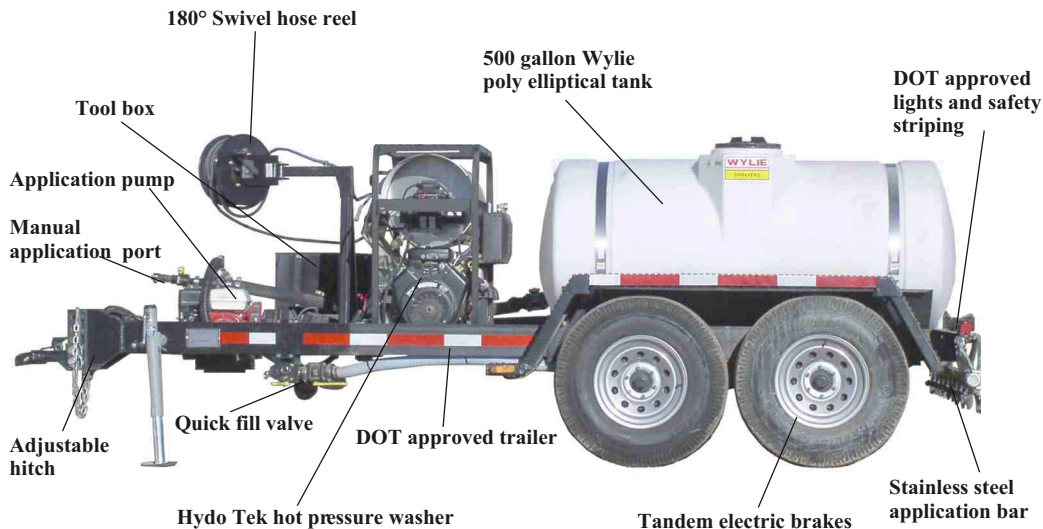

- **Chem-Crete PAVIX applicator**
- **Heater hydro pressure washer**
- **Auto-adjust flow rate**
- **500 gallon capacity**
- **Greater than 3% flow accuracy**

Two operations with one machine! The new multi-functional Chem-Crete application machine features a Hydro Tek heated power washer that can be operated at 250°F and 3,000 psi of cleaning power! Concrete surfaces are easily cleaned of grease, oil and dirt preparing the surface for Chem-crete PAVIX. The Chem-Crete application machine spray bar efficiently lays down a 12 foot wide path of material covering the largest areas of concrete in little time. There is no better way to clean concrete surfaces and apply PAVIX than with the Chem-Crete application machine.

CLEAN CONCRETE SURFACES • RINSE LARGE AREAS • APPLY CHEM-CRETE PAVIX
with one piece of equipment!

Multi-Function PAVIX Applicator

Collins Bridge - Richardson TX

SPECIFICATIONS

Length	192"
Width	87"
Height	63"
Wheel Track	72"
GVWR	8400 lb
Brakes	Tandem Electric
Trailer	DOT Approved
Tank	Wylie 500 gal. Elliptical
Pressure Washer	Hydro Tek SS30005VH
Pressure	3,000 psi
Volume	5 gpm
Temperature	250°F
Application Pump	Ace Ge650 Centrifugal
Pressure	0 -115 psi
Volume	90 gpm at open discharge
Hose Reel	180° Swivel; hand, spring rewind, electric

Raven SCS 440 Spray Controller
w/ in cab controls

Raven SCS 440 Spray Controller

The PAVIX applicator is equipped with the Raven SCS 440 automatic rate controller. The Raven sprayer control system uses a ground speed sensor and an in-cab controller to maintain the desired application rate. As the speed of the application vehicle changes, the controller automatically adjusts the amount of product being applied. The Raven system accurately maintains application rates of better than 3%.

Application width: 12 ft • Application speed: 5 - 9 mph • Application rate: 100 - 200 ft²/gal
