

# CHEM-CRETE®

*Venetian Stains*

*Venetian Stains* **by** Chem-Crete are permanent and penetrating water-based stains designed to provide unique translucent colors while protecting and sealing the surface from dirt, moisture and contaminants. A stain system, *Venetian Stains* do not coat or cover, but provide a marbled effect on natural or synthetic stones and concrete substrates.

A decorative color system, it enhances and highlights the surface variations while maintaining brilliant color on interior or exterior applications. For complete protection, *Venetian Stains* **by** Chem-Crete work well with the following environmental-friendly products, which can be used to enhance the performance of your surface.

• *SofiX CCC100* is a permanent internal waterproofing barrier designed for areas where moisture may be permeating through concrete and masonry substrates. The crystallization properties of *SofiX CCC100* help prevent delamination and the formation of efflorescence that can happen when moisture is present.

- *YufiX CCC1000* is a deep penetrating formulation used as a water repellent and sealer for all masonry and synthetic masonry substrates.
- *Chem-Seal WB 14* is used in interior or exterior applications. It is particularly effective on exposed aggregate concrete surfaces, concrete stains, and all forms of masonry stone features.
- *Chem-Sil PHP Plus* offers a polished, hardened protective finish on mechanically grounded and smoothed concrete floors. Accentuating the polished floor, it also densifies and hardens the substrate.

When creating *Venetian Stains* **by** Chem-Crete, our goal was to offer an environmental-friendly system that meets the GREEN TECHNOLOGY standards of sustainable development, while maintaining the natural environment. Chem-Crete has not only met, but has exceeded that goal with *Venetian Stains* through our constant Research and Development in the latest technologies.

• Non-Toxic • No Volatile Organic Compounds • UV Stable • No Dangerous Vapors or Fumes • Cost Effective • Non-Film Forming • Permanent Colors • Easily Applied

# Venetian Stains...A Renaissance of Color

Due to printing process, actual colors may vary. Other colors available upon request.

## APPLICATIONS

- Concrete Floors • Swimming Pool Decks • Institutional Floors • Residential Floors
- Stadiums and Arenas • Shopping Malls • Restaurants • Stone Features • Exposed Aggregates

**ISO 9001:2000 Registered - ISO 14001:2004**

- Waterproofing / Moisture Blockers • Asphalt and Concrete Protection • Industrial Flooring
- Grout, Injection and Foam • Surface Treatment, Sealers and Bonding Agents • Tile Products
- Adhesives • Joint Sealant • Curing and Form Release Agents • Concrete and Asphalt Repair
